This is a laser interlock that can be used to couple the laser module e. for doors. ! If you are using the Axio observer microscope stand, press the on/off button on the left-hand side first to turn the microscope on. Page 2 Page 3 Page 3 18 09/2011 Scanning an Image Setting the Parameters for Scanning! Select the Acquisition Mode tool in the left tool area (Fig. 5) is opened. The color and brightness of the interface has been carefully adjusted to the typical light conditions of the imaging lab, ensuring optimal display contrast and minimum stray light for high sensitivity detection experiments. The number of pixels influences the image resolution! Adjusting the Sweep Speed! Use the scan speed slider in the acquisition mode tool (Fig. Scan speed 8 usually produces good results. 5). The area for viewing and interacting with images is centered in the middle of the main application window: the center screen area. Please help us share our service with your friends. Click Cancel to interrupt / stop system startup. 1 Starting the system

5/3 e 4). A focus in the development of Zen 2011 was to fulfill the needs of both basic and expert microscopy users. The file management and data handling tools are found in the tool area on the right (see Fig. Choosing the dynamic range! Select the dynamic range 8 or 12 or 16 bits (per pixel) in the bit depth allowance in the acquisition mode tool (Fig. The offline / demo mode reads the current hardware database, but does not activate the system hardware for use. 2 Introduction to Zen - efficient navigation ..... 1/1) of the electronic module and laser to the right to start the laser. A greater speed with the month of results at the best sign-noise relationship. In the operation manual, read the safety of the chapter Conversion operation. 1 Turn the switch of the Start System button, the image processing button is changed to a cancellation button. For each tool, the user can activate Show all mode To view and use additional functionality (Fig. After initialization, the Zen Main application window (Fig. Befolr, this fast guide is written for a user who is familiar with the fundamentals of the laser scan microscopy. In the small boot window, choose to start the online system (home system hardware to purchase new images) or in image processing mode to edit images. existing. Follow the security instructions described in the X-CITE 120 Operating Lamp / HBO 100 Mercury Lamp. Each displayed image can be displayed and / or analyzed with many options exhibiting available through the display guides that can be found on the left side of the image. Select the size of the Table as a predefined pixel number or enter your own values (for example, 300 x 600) in the acquisition mode tool. Arranged from top to bottom, they follow the logic of the experimental workflow. 19). 18 Storing and Exporting Image Data ..... Zen software is optimized for a 30 "TFT monitor, but also can be used with Double-20 TFT Settings. 5/1). 4 / d) finds the tools for sample observation, image acquisition, imaging and system maintenance, easily accessible through four main guides (Fig. Speed 6 or 7 for upper images. 10 Configuring the path and beam lasers ..... 24 Introduction This fast LSM 700 guide describes the basic operation of the scanning microscope to J2/2 J2/2 J021 PXH uo 57 OBX 001 OBH ( oEŠŠAnimuli aus e oip'Ăscorcim o .sodatencoc aruderrav ed soigjĂtse so otecke .ametsis od setnenopmoc so sodot anretla ossl .otnemaniert ed snif arap ametsis od erawdrah o alumis ele .ossid zev mE .1102 neZ erawtfos o moc 007 MSL the back of the laser module.
